5th World Congress on Preventive & Regenerative Medicine

5 – 7th October 2010 · Hannover · Germany

Welcome Address

Dear Colleagues,

I'm proud to invite you today for the 5th time to the World Congress on Preventive and Regenerative Medicine, to be held at the Convention Center at the Exhibition Grounds in Hannover, Germany from 5-7 October 2010.

Since 2003, we have been organizing this key event in the field of Regenerative Medicine - first in Leipzig, than in Bangkok, and now in Hannover.

More than seven years ago we established the World Congress on Regenerative Medicine as the only event addressing the entire sector of regenerative medicine. This provides the one and only complete program for global experts, as we had recognized that such a platform was missing. The World Congress on Preventive and Regenerative Medicine (WCRM) is being backed by the World Federation Preventive & Regenerative Medicine and will thus continue to be the most complete event reflecting the world wide state of the art in preventive and regenerative medicine. This time we will combine together preventive with regenerative medicine, as these two areas may be just the two sides of the same coin: Prevention and Regeneration. We recognize the synergy between these fields and are convinced that this integration will be fruitful for the future development of the fields.

This world congress will also be the first joint activity of the World Federation Preventive & Regenerative Medicine and the World Virtual Institute Preventive & Regenerative Medicine: PYRAMED. With the World Congress on Preventive & Regenerative Medicine we

further intend to provide scientific excellence and exchange of knowledge on cutting edge developments in all fields concerned.

We have a strong partner in the Deutsche Messe, which has already been responsible for organizing the BIOTECHNICA, Europe's key exhibition for the entire biotechnology sector. The World Congress will also include exhibitions on preventive and regenerative medicine - related both to consumer needs and to industrial products.

In 2010, the WCPRM will be held for the first time in parallel to the BIOTECHNICA, providing an excellent environment for science, technology, industry and intended for both health care professionals and the educated public. The congress and the exhibition deal with related areas and areas and will act synergistically. Sponsors and exhibitors of the WCRM will be able to present in a dedicated area of BIOTECHNICA. This will guarantee them maximal visibility for the exhibition of their latest innovations in the fields of stem cells and regenerative medicine.

We are looking forward to welcoming you in Hannover, Germany.

Hannover, December 1st 2009

Professor Dr. med. Augustinus Bader
(President of the 5th WCPRM 2010)

5th World Congress on Preventive & Regenerative Medicine
